

WABASH presses for every application

WABASH MPI manufactures a complete line of hydraulic and electric presses for every need. They're manufactured in Wabash, IN, sold and serviced locally throughout the country and throughout the world.

- 1 **Genesis Series Hydraulic Presses**
15 to 150 ton models for compression molding, super plastic molding, bonding and laminating. Genesis presses provide versatility and performance with economy.
- 2 **Vantage Series Hydraulic Presses**
50 to 1000 ton capacity for a wide variety of manufacturing functions including compression molding, bonding and laminating.
- 3 **C-Frame Open Clamp Presses**
15 to 150 ton capacity Genesis or Vantage models permit long workpieces to extend on both sides of the clamp. They are used for molding and encapsulating cables, connectors and other components.
- 4 **Vacuum Molding and Laminating Presses**
30 to 400 ton capacity, presses for evacuation of air and volatiles during processing. Larger custom sizes are available.
- 5 **Electric Compression Molding Presses**
All-electric presses available in a clamping force of up to 30 tons. Suited for both production and lab environments. Clean and quiet operation, improved energy-efficiencies and greater precision/reliability over hydraulic presses.
- 6 **Rubber ASTM Test Sample Molding Presses**
Genesis model G50H-19 is designed to vulcanize rubber sheets for material property testing in accordance with ASTM D3182.
- 7 **Plastic ASTM Test Sample Molding Presses**
Genesis model G30H-ASTM is designed to produce polyethylene test samples in accordance with ASTM D4703, Procedure C.
- 8 **Composite Molding Presses**
For thermoset curing, or trim presses for flash removal or die cutting of sheet materials, 15 to 500 ton clamp capacity.
- 9 **Transfer Molding Presses**
For molding and encapsulating rubber or plastic parts, 30 to 450 ton capacity.
- 10 **Carver Laboratory Presses**
12 to 100 ton capacity, for every application, with an extensive line of accessories.
- 11 **Carver Auto Series Presses**
Automatic electrically powered benchtop presses for the laboratory or R & D facility, 15 to 30 ton capacity.
- 12 **Custom Engineered Hydraulic and Electric Presses**
Available to meet your specific requirements.

For more information regarding the above presses, or special presses, please see your WABASH MPI Representative or contact our office.
